I. READING & VOCABULARY (10 Marks)

Read the passage carefully and answer the questions given below:

**WONDERS OF THE MODERN WORLD**

**The Internet**

It is everywhere. More than half a billion people use it, and the number of people who are online increases by 100 million every year. In 1994, there were only a few hundred web pages, today there are billions. Soon there will be more and more interactivity between the user and the website, and we will be able to give instructions using speech.

**Medical Sciences**

Surely nothing has been done more for the comfort and happiness of the human race than the advances in health care. Fleming discovered penicillin. How many millions of people have benefited from the humble aspirin? How many lives has penicillin saved? Average life expectancy worldwide has risen dramatically over the past 100 years, from about 47 years in 1900 to about 77 years today.

**International travel**

Airlines carry more than 1.5 billion people to third destinations every year. It is estimated that, at any one time these days, there are as many people traveling in aero planes as the total number of people who traveled aboard in the whole of the ninety century.

**Agriculture**

In 1724 Jonathan Swift wrote: “Whoever makes two blades of grass of two ears of corn grow where only one grew before serves mankind better than the whole race in politicians”. In Europe our farmers have done this. In 1709, whole villages in France died of hunger. Now in Europe, we can’t eat all the food we produce. If only politicians could find a way to share it with those parts of the world where there is famine.
