I. Reading (8 marks)

A. Read the passage carefully and answer the questions that follow.

A. Amazon.com was one of the first companies to try to sell products on the Internet. Jeff Bezos started the company. One day he made a prediction about the future. He saw that the World Wide Web was growing 2,000 percent a year. He predicted that it was going to continue to grow, and he thought that shopping was going to move to the Internet. People were going to shop online. He quit his good job and drove across the country to Seattle, Washington. There he started an online bookstore called Amazon.com. Bezos had very little money. The company began in a garage (a building for a car), and at first there were few customers (people who buy things).

B. At the Amazon.com site, people can search for a book about a subject, find many different books about that subject, read what other people think about the books, order them by credit card, and get them in the mail in two days. This kind of book store was a new idea, but the business grew. In a few years, Amazon.com had 10 million customers, and sold 18 million different items in categories including books, CDs, toys, electronics, videos, DVDs, home improvement products (things that you use to fix up a house), software, and video games.

C. Today, at a “virtual shopping mall” (a group of online stores) you can buy anything from gourmet food (special, usually expensive food) to vacations. Fifteen years ago, many people said, “Online shopping is crazy. Nobody can make money in an online company.” They were wrong. Today Jeff Bezos is a billionaire. Online companies are making a profit. It is a huge business.
