I. READING (10 Marks)

Read the following passage carefully and then answer the questions below:

Food Around The World

The kind of food we eat depends on which part of the world we live in, or which part of our country we live in. For example, in the south of China they eat rice, but in the north they eat noodles. In Scandinavia, they eat a lot of herrings, and the Portuguese love sardines. But in central Europe, away from the sea, people don’t eat so much fish; they eat more meat and sausages. In Germany and Poland, there are hundreds of different kinds of sausages.

In North America, Australia, and Europe there are two or more courses to every meal and people eat with knives and forks. In China there is only one course, all the food is together on the table, and they eat with chopsticks. In parts of India and the Middle East, people use their fingers and bread to pick up the food.

Nowadays it is possible to transport food easily from one part of the world to the other. We can eat what we like, when we like, at any time of the year. Our bananas come from the Caribbean or Africa; our rice comes from India or the USA; our strawberries come from Chile or Spain. Food is a very big business. But people in poor countries are still hungry, and people in rich countries eat too much.
